Rowe County Surveyor as recorded in book 3 pages 123 and 198 and book 5 page 4 of the County surveyors notes.

B. Description of corner evidence found and/or method applied in restoring or re-establishing corner:

Found 14" x 1-1/4" x 14" steel bar (iron Blick Shoal) at the surface of the pavement in centerline of Columbia Road.

   I, Gilbert M. Batch, in a field survey on 28-February, 2005, do hereby state that under requirements of P.A. 74, Michigan P.A. of 1970, the corner points metioned in lines 1 and 2 above were in
   accordance with regulations and rules governing as required in the current manual of survey instructions of the United States Department of the Interior, Bureau of Land Management and by a decree
   of a Court of Law and that the corner points mentioned in lines 3, 4 and 5 above were in accordance with the rules of the Michigan Board of Land Surveyors as a Decree of a Court of Law established.
   -established, monuments, received, fixed as expressed herein.

NOTE: More than 2 corners, all in the same town and range, may be recorded on this certificate.

A. Description of original monument and accessories and/or subsequent restoration:

1) February 1828 - Corner originally set by Joseph Wampeter in a GLO survey. Page 44 of the Ingham County GLO notes. Set G Cor 4 S x 6 S for Witnesses: Eln S 52E 19 Ricks

2) 30-April-1848, Corner relocated by W. Rows County Surveyor as recorded in book 5 page 188 and book 6 page 4 of the County surveryors notes. Corner is shown as being 39.83 3/4 Chancery (2099.8 feet) East of the South 1/4 corner of Section 5, 12N, R1E.
   No corner references or witnesses for this corner in the notes.

   Continued on Sheet 2

B. Description of corner evidence found and/or relocated applied in restoring or restablishing corner:

E3 Found 1/2" x 18" steel bar at the surface of the pavement 4 feet south of the centerline of Columbia Road.

This corner has two recorded points for the corner at E3. The first recorded corner as established by Oscar Buss, P.S. #38374 was set by a method that does not conform to the reestarted guidance as established by the GLO instructions of 1915. This surveyor does not agree with the location of the corner and could not find any physical or record evidence supporting the location of the point. Information pertaining to this corner is referenced in Table A above and referenced in Table C below.

The second corner as established by Austin C. Williams, P.S. #57637 was established in a method that does not agree with the guidelines as established by the GLO instructions of 1915 for a last corner according to the information provided in the item 20 of his recordation certificate. In viewing this corner as an obliterated corner, the location matches very closely within 0.3+/- feet to the location of the corner as referenced in a survey by County Surveyor W. Rows in 30-April-1886 (Sheet 2 in Table A). Corner E3 is referenced in this same survey as being used to establish the corner at E3. The survey shows that the corner at E3 was an "Iron Sleigh Shoe" which was recovered during a field survey by Geoscan Design Inc. on 28-February-2005.

Accpeted the location of the 1/2" steel bar as a faithful perpetuation of an obliterated corner by using the information provided in Table A item 2 above. Set a 3/4" x 24" steel bar and cap stamped "P.A. 345, P.S 47942" in a monument box. Did not excavate due to prior excavation by the Ingham County Recordation Program on 10-May-1969.

Measurements:
   (E3-E2) = 2636.17 (E2-E3) = 2636.39

C. Description of monument for corner and accessories established to perpetuate locating the position of the corner:

Set standard Ingham County 3/4" x 3/4" smooth steel bar and cap stamped "P.A. 345, P.S 47942" in a monument box at the location of the found 1/2" steel bar.

Searched at apparent location of corner and found two 1/2" REBARS as set by surveyor MAHIEU, BEING 15' APART, ON AN EAST-WEST LINE, AS PER ITEM A-8 ABOVE. THE EASTERNLY OF THE TWO REBARS BEING THE CORNER WITNESSED IN HIS SURVEY OF ITEM A-8. HOWEVER HIS INTENTION WAS TO WITNESS THE WESTERLY REBAR AS THE QUARTER CORNER. MAHIEU MEASURED 2643.59' WEST, WHICH CLOSELY MATCHES THE TRAVERSED DISTANCE TO THE WESTERLY REBAR. (MEASURED 2644.39') REVIEWED CORNER LOCATION WITH SURVEYOR MAHIEU AND DETERMINED THAT HE HAD INCORRECTLY WITNESSED THE CORNER MARKING THE WEST EDGE OF THE DEER CREEK DRAIN EASEMENT, BEING 15' EAST OF THE SECTION CORNER. ACCEPTED THE WESTERLY REBAR SET BY MAHIEU IN 1999, AS THE CORRECT LOCATION OF THE EAST 1/4 CORNER AND SET A STANDARD INGHAM COUNTY BAR & PA 345 CAP #30090, IN FOUND LOCATION. FOUND CORNER FALLS ABOUT 81' WEST OF THE CENTERLINE OF DEER CREEK EXTENDED FROM THE SOUTH, AND 1.5' SOUTH OF AN EAST-WEST FENCE. TRAVERSED SECTION TO FIND THAT THE CORNER FALLS 1.30' EAST X 3.67' NORTH OF THE SINGLE PROPORTIONATE LOCATION. MEASURED DISTANCE NORTH NEARLY MATCHES JACKSON'S DISTANCE IN ITEM A-3 ABOVE. MEASURED NORTH 2622.60' TO E-3 (JACKSON MEASURED 2620.20', MAHIEU MEASURED 2621.82'), SOUTH 2629.95' (MAHIEU MEASURED 2630.20') TO E-5 AND WEST 2644.39' TO D-4 (MAHIEU MEASURED 2643.59').

C. Description of monument for corner and accessories established to perpetuate locating the position of the corner:
