Run by the true Meridian Map Van 1850-8 Surveyed & Recorded June 1874 by T. J. Brown, Sup. Co. Survey, Sup. Co. Mich.

At the corner (10) the nearest quarter post I found the old stakes by surveying from the center of section truly give East to the quarter post finding it within any one foot of the point measured to, and is a little south and west from the one made by Mr. Brown. Set a stone and crockery ^{for} a Sugar 7 in diam bears N 18 1/2 E 132 links. Then corrected N 13 for Sugar 22 in diam bears N 37 1/2 W 25 1/2 lks & Beech to S 62 1/2 W 24 1/2 lks

TOWN Three North, RANGE One East, MERIDIAN OF MICHIGAN.

Survey of section Twenty nine in Township No Three North of Range No One East as shown by the plat the scale of which is 13 chains to one inch by which all the corners are described by letters referring to the same, and the distance given on all lines measured. The east half of the south west quarter was divided thus 22.66 acres being set off on the north end, then 22.68 acres from the west side of what remained leaving 34.66 acres more or less in 1883 in compliance with the deeds thereof.

Noted at the corner (1) I find ²to stakes I saw one made by W. H. Rayner, the other claimed by Mr. Kent to be the original corner and I am of the opinion that he is right and my reasons are these that the original survey makes the west half of section Twenty nine 40.08 chains and the east half of section 29, 40.03 chains or difference of 5 links. Now according to Mr. Rayner the west half of section 28 16 links too long and the east half of section 29, 16 links too small. When the corner noted in this record makes the sides agree with the original.
